

Ayman Eddamane

Engineering Student in Computer Science & Intelligent Systems — Full-Stack & AI Developer
eddamaneaymane@gmail.com — +212 762712110 — LinkedIn — GitHub

EDUCATION

Double Degree in Software Engineering, EILCO – Université du Littoral Côte d’Opale (ULCO), Calais **2026 – 2028**

Engineering Degree in Software Engineering & Intelligent Systems, ENSAM Meknès **Sept 2024 – 2026**

Integrated Preparatory Classes, ENSAM Meknès **Sept 2022 – Jul 2024**

EXPERIENCE

Software Engineering Intern, DXC Technology Morocco **June – August 2026**

- Built an incident management web application with a fellow intern, architecting a Spring Boot monolith backed by PostgreSQL, Kafka, and WebSocket/STOMP for real-time updates; owned the architecture decisions, ticket-package skeleton, and file storage design.
- Implemented SLA deadline tracking with automated escalation and RCA (root cause analysis) reporting to support incident resolution and audit trails.

Web Development Intern, Digital Development Agency (ADD) **June – July 2025**

- Developed **Park It**, an IT asset management platform with asset assignment, checkout forms, contract management, and an AI-powered search chatbot using React, Express, Python, MongoDB, and LangChain within an Agile/Scrum team.

PROJECTS

Calendar AI Planner *AI-powered scheduling application*
Spring Boot, Spring Security, React, PostgreSQL, Tailwind CSS

- Developed an intelligent scheduling platform with a live calendar, automated task prioritization, and AI-assisted planning.

CodePoster *Real-time multiplayer coding platform*
Spring Boot, WebSockets, Kafka, React

- Developed a real-time multiplayer coding platform with collaborative coding rooms, integrated code compilation, sabotage-based gameplay, and AI-assisted development using WebSockets and Kafka.

Health Coaching App *AI-powered health coaching platform*
React, Express, MongoDB, Flask, Gemini, LangChain, Socket.IO

- Implemented health tracking, real-time chat, and a RAG-based AI chatbot providing intelligent recommendations.

Model-Driven Intelligent Observability *Multi-agent code review and observability system*
Spring AI, GitHub Actions, Webhooks, AST Parsing, Redis, Kafka

- Built a multi-agent code review system using Spring AI, Kafka event choreography, and a Redis blackboard, enabling specialized agents to analyze pull requests in parallel and synthesize a consolidated review.

Agri Gen *No-code IoT application*
Next.js, Python, Cisco Packet Tracer

- Created a no-code tool that generates Python scripts for IoT network configurations in Cisco Packet Tracer.

SKILLS

Backend:	Spring Boot, Node.js, Express.js, REST APIs, WebSockets, JWT Authentication
Frontend:	React.js, React Native, Next.js, Tailwind CSS
AI / Data:	Python, Spring AI, OpenAI API, LangChain, RAG, Flask, Multi-Agent Systems
Databases:	PostgreSQL, MongoDB, SQL, Redis, Schema Design
Distributed Systems:	Apache Kafka, Event-Driven Architecture, Real-Time Systems
Tools:	Git, GitHub, Docker, Postman, GitHub Actions, H2
Certifications:	Oracle Certified Foundations Associate; Oracle Certified AI Foundations Associate; Python Intermediate – DataCamp; Microsoft Azure – DataCamp
Languages:	Arabic (Native), French (Fluent), English (Fluent)

ACTIVITIES

Enactus: Technical Team Member and Project Manager – organized web development workshops, mentored members, and led a social impact entrepreneurial project.

Gadz’IT Club: Sponsorship Team Member – negotiated partnerships and funding opportunities for events.

Hackathons: Capgemini Hackathon, Hackatus, Hackathon AgriNova.

INTERESTS

Artificial Intelligence, LLMs, Multi-Agent Systems, RAG, Open Source, Software Architecture, Clean Code, Technology Entrepreneurship.
